## Brownfield Cleanup Program (BCP) Application

### Notes

Note 1: Certain potential uses of the property are consistent with applicable zoning requirements. Furthermore, the Agreement of Sale between Con Edison and the Developer, East River Realty Company, LLC, requires the Developer to seek zoning changes to achieve an FAR of 12, which are consistent with land use patterns in the area.

Note 2: Applicant does not believe that the project will result in a disproportionate adverse environmental impact on the community. For a full discussion of the potential environmental impacts of the project, please see the recently completed Final Generic Environmental Impact Statement (ENB February 04, 2004).

Note 3: The East River is proximate to the Site.

Note 4: The Kips Bay Fuel Terminal Site is within a floodplain.

Furthermore, the Agreement of Sale between Con Edison and the Developer, East River Realty Company, LLC, requires the Developer to seek zoning changes to achieve an FAR of 12, which are consistent with land use patterns in the area.

Note 2: Applicant does not believe that the project will result in a disproportionate adverse environmental impact on the community. For a full discussion of the potential environmental impacts of the project, please see the recently completed Final Generic Environmental Impact Statement (ENB February 04, 2004).

Note 3: The East River is proximate to the Site.

Note 4: The Kips Bay Fuel Terminal Site is within a floodplain.

Furthermore, the Agreement of Sale between Con Edison and the Developer, East River Realty Company, LLC, requires the Developer to seek zoning changes to achieve an FAR of 12, which are consistent with land use patterns in the area.

For a full discussion of the potential environmental impacts of the project, please see the recently completed Final Generic Environmental Impact Statement (ENB February 04, 2004).

Note 3: The East River is proximate to the Site.

Note 4: The Kips Bay Fuel Terminal Site is within a floodplain.

Note 5: Con Edison has in the past been charged by NYSDEC with violations of Article 27 of the ECL. However, these violations have been resolved or are being resolved to NYSDEC's satisfaction. Further, NYSDEC has not relied on these violations as a basis for denying Con Edison permits under Article 27 of the ECL or any other provision of the ECL.

Note 6: In 1995, Con Edison pleaded guilty in 1995 to four counts involving the failure to report the release of asbestos from an August 1989 steam explosion in the Gramercy Park section of Manhattan, making false statements in connection therewith, and conspiracy to defraud the United States. Con Edison paid the fine and completed the probation to which it was sentenced by the United States District Court for the Southern District of New York. Con Edison has disclosed this conviction in its past application to NYSDEC for Waste Transporter Permits under Article 27 of the ECL and NYSDEC has not relied on these violations as a basis for denying Con Edison such permits.

### **Project Description**

**ATTACHMENT B****PROJECT DESCRIPTION****1. Project Purpose and Scope**

The purpose of the project is to transfer from the Voluntary Cleanup Program to the Brownfield Cleanup Program in order to complete a remedial scope of work at the site. The scope of work for the site is specified in the referenced NYSDEC-approved Remediation Work Plan for the Kips Bay Fuel Terminal Site located at 616 First Avenue.

The objective of the work is to ready the Site for unrestricted development for residential and commercial use to a depth which is the higher of: the top of competent rock, the mean high water table, or a depth of 16 feet below grade ("Development Depth"). At and above that depth, site conditions will be remediated such that no deed restrictions, institutional or engineering controls or further consents, approvals or authorizations will be required by NYSDEC.

It is the further objective that, following completion of the site remediation activities and subject to any ground water monitoring that may be required, the site will be in a condition to be improved to the Development Depth, including the installation of piles to the top of bedrock or caissons and dewatering as necessary, without the need for any special worker health and safety precautions or equipment during construction activities conducted above the Development Depth.

**2. Estimated Project Schedule**

The estimated project schedule is provided in the above-mentioned NYSDEC-approved Remediation Work Plan for the site, and in the monthly updates provided by TRC to NYSDEC.
